ABOUT FROGBILL

From the first quote to the final payment.

FrogBill is online invoicing and quotation software for freelancers and small businesses in India and the Gulf. It replaces Word templates, Excel sheets and handwritten bill books with one simple app that runs in the browser and installs on a phone.

A business creates a professional, GST or VAT-ready quotation in minutes and sends it on WhatsApp as a link. The customer opens it on their phone, accepts and signs it online, and the quotation becomes an invoice in one tap.

Invoices carry a UPI QR code and bank details, so customers pay the business directly. FrogBill tracks what is paid and what is due, and sends WhatsApp payment reminders, so the owner spends less time chasing money and more time on the work.

For businesses that work on site, FrogBill also runs projects, service contracts (AMC) and a Today app for technicians.
